

Southern Interior Dryland Forage Mix

- Interior
 - Prefers dry conditions
 - Good general purpose dryland blend
- For:*
- Hay
 - Silage
 - Grazing

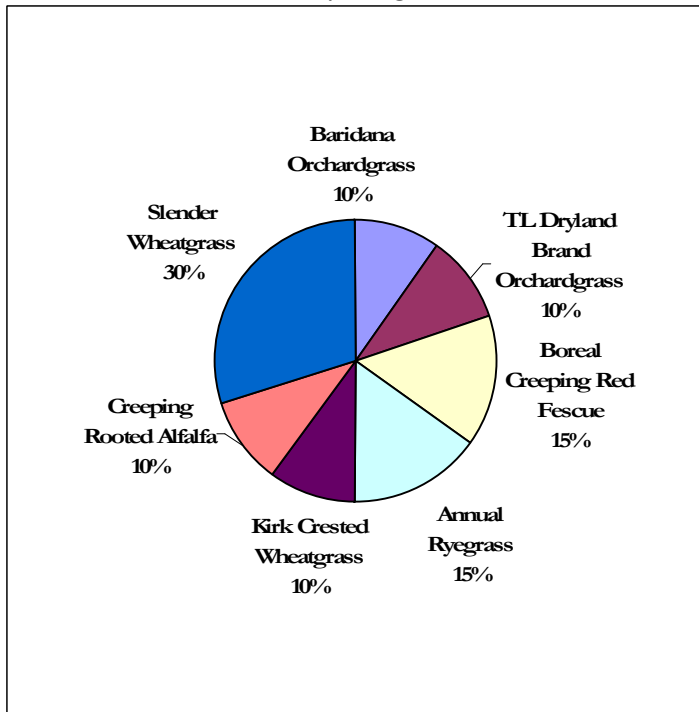

Southern Interior Dryland is designed for non-irrigated pasture or hay regions of the southern BC Interior. The species in this mixture have been selected to create a drought-tolerant blend. Annual ryegrass is present at just the amount to be a short term nurse crop for the rest of the mixture.

This mixture comes in 20 kilogram bags and should be seeded at 25-30 pounds per acre, depending on seeding conditions and desired growth density.

*Richardson Seed forage mixtures *do not* contain endophyte-enhanced grasses.
