Revegetation Advisor

This just in:

Great News!

Great news! After careful consideration, Profile has granted TerraLink ESP (Engineered Specified Products) distribution for the Province of British Columbia.

This means that in addition to being a distributor of Ecofibre (wood fibre hydroseeding mulch), TerraLink is now the place to go for Profile's line of highly advanced, engineered erosion control products that are sure to become the industry standard for not just roadsides and disturbed sites, but also for new construction and golf courses as well.

Other products available from Profile:

- EcoFibre
- EcoFibre + Tack
- EcoAegis

See the inside spread for info on **Flexterra**, Profile's featured product!

Green and Strong

Native Grasses

Interest is continually growing in the use of native species to revegetate disturbed areas. Grass that is naturally more suited to growing in a particular place is more likely to thrive than one that is not native to the area. In the end, time and money can be saved and the local ecology can be restored.

TerraLink is pleased to offer a selection of native grasses that are often specified by project managers. We do our best to keep a supply in inventory, however on occasion some of the following items may have to be special ordered. Please provide as much time as possible when ordering to ensure the seed you need is available. The following species are available separately in quantities as small as 5 lb, or custom mixed to meet your requirements.

- Alpine Bluegrass
- Big Bluegrass
- Bluebunch Wheatgrass
- Canada Bluegrass
- Fowl Bluegrass
- Glaucous Bluegrass
- Idaho Fescue
- Indian Ricegrass
- Junegrass
- Rocky Mountain Fescue
- Rough Fescue
- Sandberg Bluegrass
- Sand Dropseed
- Sheep Fescue
- Tufted Hairgrass

For your convenience, we have a ready-made Native Grass and Clover mix:

- 5% Canada Bluegrass
- 5% Rocky Mountain Fescue
- 15% Sheep Fescue
- 20% Creeping Red Fescue
- 5% Bluebunch Wheatgrass
- 30% Slender Wheatgrass
- 5% Tufted Hairgrass
- 5% Alsike Clover
- 6% Single Cut Red Clover
- 4% White Clover

Standard Revegetation Mixes:

TerraLink has a full line of pre-formulated Richardson Seed™ revegetation mixes. Many of them are already in inventory, ready to be shipped. If we don't have what you need, we can have it ready typically within one business day.

- Rapid Grow/Slope Stabilizer
- Roadside
- Premium Roadside
- Flowering Roadside
- Low-Growing
- Riparian/Wetland
- Coastal General
- Interior General
- High Elevation

Please see back cover for information on our Wildflowers.

Flexterra® HP-FGM™

**600% GREATER GERMINATION,
NEARLY PERFECT EROSION CONTROL,
NOW 100% BIODEGRADABLE.**

New Flexterra® High Performance-Flexible Growth Medium™ (HP-FGM™) takes the near-perfect performance of the original Flexterra FGM to an even higher level. Introduced in 2004, Flexterra FGM rapidly set a new standard of excellence for controlling erosion and establishing vegetation on severe slopes. It outperformed blankets and led the movement toward more cost-effective, environmentally responsible hydraulically applied techniques. Flexterra HP-FGM represents the next generation in Flexible Growth Media and is proven to surpass the original's outstanding performance.

NEW FLEXTERRA HP-FGM DELIVERS:

- The highest germination and growth establishment
- Greater than 99% erosion control effectiveness immediately upon application
- 100% biodegradability
- Greater safety for even the most sensitive aquatic environment because it's non-toxic
- Near-perfect erosion control and denser vegetation while protecting the natural environment

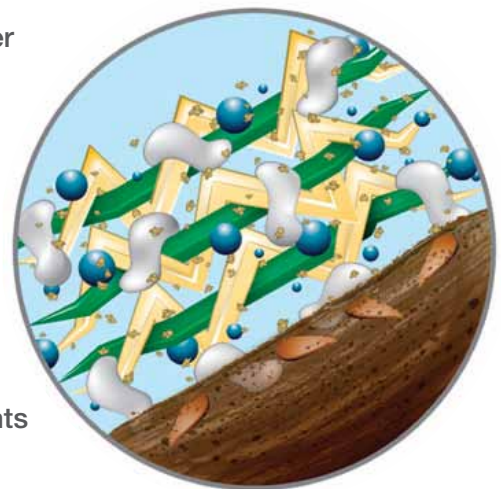

NEW HP TECHNOLOGY: GREENER BY DESIGN

 Revolutionary Micro-Pore particles optimize water and nutrient retention

 100% recycled Thermally Refined® wood fibers not only produce the highest yield and coverage per pound, they are also phyto-sanitized, eliminating weed seeds and pathogens

 100% biodegradable interlocking man-made fibers help increase wet bond strength

 100% non-toxic biopolymers and water absorbents further enhance performance

SETTING THE BAR EVEN HIGHER.

- > **BETTER EROSION CONTROL**—Flexterra® HP-FGM™ immediately bonds to the soil surface. Its flexible yet stable matrix retains > 99% of soil, vastly reducing turbidity of runoff for up to 18 months. HP also features greater wet bond strength yielding increased resistance to sheet flow.
- > **GREATER SEED GERMINATION AND GROWTH**—High Performance matrix outperforms traditional Flexterra FGM with 600% better initial germination and 250% increased biomass due to a combination of optimized water and nutrient retention.
- > **SAFER FOR THE ENVIRONMENT**—Unlike rolled erosion control blankets, Flexterra HP-FGM has no nets or threads to endanger wildlife. It uses 100% biodegradable crimped interlocking fibers and 100% recycled and phyto-sanitized wood fibers. Flexterra HP-FGM is 100% safe for aquatic and terrestrial life forms.
- > **EARTH-FRIENDLY and SUSTAINABLE RESULTS**—Flexterra HP-FGM is a result of Profile's Green Design Engineering™, creating cost-effective and environmentally superior solutions through the design, manufacture and application of sustainable erosion control and vegetation establishment technologies.

Put Green Design Engineering into action. PS3 is the industry's first and only web-based design and selection tool that integrates erosion and sediment control engineering with agronomic experience. Log on to www.ProfilePS3.com to find the right solution for any site.

Natural Beauty

Wildflowers

Wildflowers are also in high demand. The beauty of flowers coupled with the ease of care of a revegetation mix might be just the right solution for your situation. Seed straight flowers, or in a mix with grasses for a meadow effect.

The following species are available separately or in a mix. As with the native grasses, TerraLink will make every effort to keep these Richardson Seed™ items in stock, but on occasion some may have to be special ordered. Please inquire.

- Annual Baby's Breath, "Covent Garden"
- Baby Blue Eyes
- Bachelor Button, Dwarf
- Black-eyed Susan
- Blanketflower
- Blue Flax
- Blue Flax, Apar Blue
- California Poppy
- Corn Poppy, "American Legion"
- English Daisy Double Mix
- Evening Primrose
- Farewell to Spring, Semi-Dwarf Single Mix
- Flanders Poppy
- Fleabane Daisy
- Lacy Phacelia
- Lance-leaved Coreopsis
- Mountain Garland
- Northern Lights
- Perennial Lupine
- Plains Coreopsis
- Shasta Daisy
- Shirley Poppy

- Siberian Wallflower
- Spurred Snapdragon, Dwarf
- Strawberry Clover
- Sweet Alyssum, "Carpet of Snow"
- Sweet Alyssum, "Tall White"
- Sweet William
- White Yarrow

Richardson Seed™ Standard Wildflower Mix

Available in bulk quantities of at least 5 lb or in convenient 1 lb packages:

- 17% California Poppy, orange
- 15% Shasta Daisy, white
- 15% Sweet William, mixed colours
- 15% Bachelor Button (dwarf), mixed colours
- 10% Siberian Wallflower, orange
- 10% Blue Flax, blue
- 8% Godetia, mixed colours
- 5% Black-eyed Susan, yellow
- 3% Red Corn Poppy, red
- 2% Snapdragons, Fairy Bouquet, mixed colours
