

Stella Maris® Extract Improves Root Growth and Plant Development

As a registered aquatic plant extract, **Stella Maris®** is proven to increase root growth and plant establishment. Growth, quality and yield all depend on a strong plant with a large, healthy root system. Give your plant the best start possible - give it **Stella Maris®**.

The pictures below confirm **Stella Maris®** treated lettuce seedlings had an improved root system and top growth. **Stella Maris®** treated leaves are stronger and less spindly making them more attractive.

Stella Maris® Extract:

- Increases desirable yield
- Improves root growth and plant establishment
- Maximizes crop potential during periods of stresses

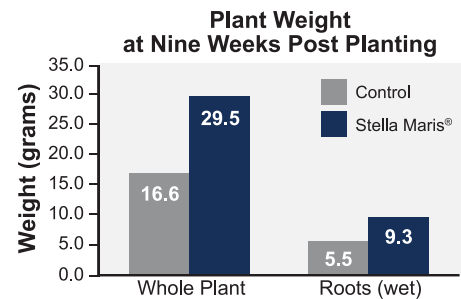

Stella Maris® Extract improves root and plant development. This has been demonstrated in a wide range of crops and plants. Plants with stronger root systems make the most efficient use of water and nutrients and are better able to withstand transplant shock allowing for faster establishment in the field. **Stella Maris®** gives your plant the best start possible.

The following picture shows root scans of lettuce plants using a WinRhizo root scanner 54 days after planting. **Stella Maris®** treatment showed significantly improved root development and doubled the number of small roots over the Control.

The following graph confirms **Stella Maris®** improves plant weight. In the **Stella Maris®** treated plots, the roots alone weighed 69% more than the Control.

As a result of this improved early root growth and development, strawberry yield increased by 19% and translated into a substantial increase in grower's income.

Acadian Seaplants meets and exceeds the demands of today's growers by providing a superior seaweed extract product that is proven to increase root growth and early development. Our **Stella Maris®** Extract is made from the most active seaweed species in the world and is hand harvested preserving the base of the plant, guaranteeing it will grow back. Acadian Seaplants provides you with credible research and support ensuring that when you buy **Stella Maris®**, you buy a consistent, top quality product. We use a gentle extraction process that ensures the maximum amount of beneficial compounds is in the final product and released to your crop. This is why top growers respect and demand **Stella Maris®**.
