

# Stella Maris

## Aquatic Plant Extract

## Shield Your Plants from Water Stress

**Stella Maris**® Aquatic Plant Extract is derived exclusively from *Ascophyllum nodosum* kelp harvested from the nutrient-rich North Atlantic coastal waters of Nova Scotia. It is a source of naturally occurring major and minor nutrients, carbohydrates, amino acids and bioactive compounds that enhance crop vigor, nutrition and quality resulting in improvements in plant development and yield.

**Stella Maris**® also shields your plants from water stress. With just a few applications throughout the year, Stella Maris® can protect your crop in the hot summer months.

- Increase photosynthesis
- Improve water status
- Reduce wilting
- Better rooting for water uptake
- Increase antioxidants
- Faster recovery from stress
- Reduce membrane damage
- Enhance water use efficiency

**Stella Maris**® is now the ONLY kelp product in Canada registered with the Canadian Food Inspection Agency.

**Conserve and protect with Stella Maris**®. Call us today to find out what Stella Maris can do for your crop.
